SECTION 7: HANDLING AND STORAGE

Precautions for Safe Handling:

Keep containers adequately sealed during material transfer, transport, or when not in use. Avoid exposure to strong acids, bases, light, or oxidation conditions. Appropriate handling of this material is dependent on many factors, including physical form, duration and frequency of process or task, and effectiveness of engineering controls. Site-specific risk assessments should be conducted to determine the feasibility and the appropriateness of all exposure control measures. See Section 8 (Exposure Controls) for additional guidance.

Conditions for Safe Storage: Store in a cool, dry, well-ventilated area.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

Occupational Exposure Guideline

Exposure Limits:

Component	CAS No.	ACGIH	OSHA
Hexylene glycol	107-41-5	25 ppm (Ceiling)	(vacated) Ceiling: 25 ppm (vacated) Ceiling: 125 mg/m ³

Engineering Controls: Ensure that eyewash stations and safety showers are close to the workstation location. Use explosion-proof, grounded electrical/ventilating/lighting/equipment.

Eye/Face Protection: Not required under normal conditions of use. Wear splash-proof safety goggles if material could be misted or splashed into eyes.

Skin Protection: Not required under normal conditions of use. Body protection, such as a lab coat, gloves, shoe covers, or head cover may be necessary depending on the exposure levels. Consult your site safety staff for guidance.

Respiratory Protection: Respiratory protective equipment (RPE) may be required for certain laboratory and large-scale manufacturing tasks if potential airborne breathing zone concentrations of substances exceed the relevant exposure limit(s). Workplace risk assessment should be completed before specifying and implementing RPE usage. Potential exposure points and pathways, task duration and frequency, potential employee contact with the substance, and the ability of the substance to be rendered airborne during specific tasks should be evaluated. Initial and ongoing strategies of quantitative exposure measurement should be obtained as required by the workplace risk assessment. All RPE must conform to local and regional specifications for efficacy and performance. Consult your site or corporate health and safety professional for additional guidance.

General Hygiene Considerations: Prevent/avoid contact and wash after handling. Do not eat, drink, or smoke while handling.
