The identity of the individual components of this mixture is proprietary information and is regarded to be a TRADE SECRET. In accordance with 29 CFR 1910.1200 we have to assume that the mixture presents the same health hazards as the individual components when they are present at greater than 1% concentration.

Listed below are the health hazards of all materials present over 1% concentration and that undiluted have health hazards associated with them. Please note that not all components of the mixture have health hazards associated with them. In the event of a medical emergency the identity of all the components will be divulged to a qualified health professional.

The following effects were concluded as a result of human testing and observation of one or more of the individual components.

1) Liquid may be irritating to the skin and eyes.

2) Breathing high concentrations of vapor may cause anesthetic affects.
