Pool Care Advice from the Experts

Call 1.800.SOS.POOL
or visit us online.

BALANCE

STEP 1

Balanced water is critical to pool quality and swimmer comfort.

Optimum Balance Levels:
- pH Balance: 7.4-7.6
- Alkalinity: 80-120 ppm
- Calcium Hardness: 200-400 ppm

Why You Need To Balance Your Pool:
- To maximize chlorine effectiveness
- To prevent eye and skin irritation
- To limit pool equipment damage

Salt Pool Compatible

Treats the following:

See pages 4-5 for troubleshooting tips.

AQUAGUARD®
5-Step Pool Care System

AquaGuard® 30 Lb pH Up Pail
- Fast-Dissolving Granular Pool Soda Ash
- Quickly Raises pH And Alkalinity

116600

AquaGuard® 30 Lb pH Down Dry Acid
- Fast-Dissolving Granular Pool Acid
- Lowers pH And Alkalinity Quickly And Safely

116601

AquaGuard® 30 Lb Alkalinity Booster Pail
- Buffers Pool Water For Better pH Control
- Increases Total Alkalinity Of Pool Water And pH Of Pool Water
- Fast-Dissolving Sodium Bicarbonate

116602

AquaGuard® 30 Lb Calcium Hardness Increaser
- Prevents Corrosion Of Pool Surface And Equipment Caused By Low Calcium Levels
- Fast-Dissolving

116603

AquaGuard® 1 Gallon Calcium Hardness Reducer
- Reduces The Calcium Hardness Of Pool Water So That A Proper pH Balance May Be Obtained
- Reduces Scale Formation

116604

AquaGuard® 8 Lb Stabilizer Conditioner
- Shields Chlorine From The Destructive Effects Of Sunlight
- Reduces Chlorine Consumption
- Essential If Liquid Or Calcium-Based Chlorines Are Used

117943

AquaGuard® 1 Gallon Metal Out
- Prevents And Stops The Growth Of Metal Stains, Discoloration And Scale Formation
- Treats Up To 40,000 Gallons

116607

AquaGuard® 1 Gallon Muriatic Acid
- Powerful pH Reducer Helps Prevent Scaling Caused By Calcium-Based Chlorine And/Or Hard Water
- Ready To Use
- Not Available In All Regions

116608

2 STEP

Chlorine makes the water clean and clear for swimmers.

Why You Need To Chlorinate Your Pool:

- Chlorine disinfects the water
- It kills both bacteria and algae
- 2.0-4.0 ppm levels are optimal

Salt Pool Compatible

Treats the following:

See pages 4-5 for troubleshooting tips.

AQUA GUARD
5-Step Pool Care System

STABILIZED CHLORINE

AquaGuard® Power 99 50 Lb 3" Chlorine Tablets
- 99% Active Ingredient
- Jumbo 8 Oz Tablets
- Sanitizes And Suppresses Algae And Bacteria
- Individually Wrapped
- Slow-Dissolving For Long-Lasting Sanitation

502074

AquaGuard® 50 Lb 1" Trichloro Chlorinating Tablets
- Premium Quality
- Manufactured To Resist Crumbling
- Stabilized, Slow-Dissolving Tablets For Long-Lasting Chlorine Residual
- Ideal For In-Line Chlorinators

116611

AquaGuard® 50 Lb Trichloro Chlorinating Sticks
- 8 Oz Size
- Premium Quality
- Manufactured To Resist Crumbling
- Stabilized, Slow-Dissolving Sticks For Long-Lasting Chlorine Residual
- Ideal For In-Line Chlorinators

116612

AquaGuard® 50 Lb Dichloro All-In-One Chlorinating Granules
- Superconcentrated Formula
- 99% Sodium Dichlor
- Will Not Cloud Water, Raise pH Or Create Calcium Deposits On Tile
- Fast-Dissolving

116613

ALTERNATIVE FORMS OF CHLORINE

AquaGuard® 40 Lb Pool Salt
- For Use In Pools And Spas With Salt Chlorinators
- Brands May Vary By Region
- Not Available In All Markets

116038

AquaGuard® 50 Lb Bromine Tablets For Pools And Spas
- Perfect For Indoor Pools, Spas And Tubs
- Slow-Dissolving For Controlled Release
- Sanitizes And Prevents Algae Without Chlorine Odor

116615

AquaGuard® 1 Gallon Liquid Chlorine
CASE OF 3
- Antimicrobial, Kills Algae And Bacteria
- Will Not Cloud Pool Water
- Safe For All Types Of Pools
- Easy To Use

114222

AquaGuard® 95 Lb Blended Calcium Hypochlorite
DISSOLVES INSTANTLY
- 59.5% Calcium Hypochlorite
- Swimming Pool Water Oxidizer
- Great For Shocking Swimming Pool Water
- Kills Bacteria, Destroys Organic Contaminants, Controls Algae
- Brand May Vary By Region
Mfg #REF-50-1220

114008

3

STEP

Periodic shocking removes waste materials like suntan oils, perspiration, body oils, and other organic waste.

For best results, balance pH to 7.4-7.6 before shocking.

Why You Need To Shock Your Pool:
- To bring up chlorine and free chlorine levels
- To disinfect the water
- To restore water clarity

AQUA GUARD®
5-Step Pool Care System

Salt Pool Compatible

Treats the following:

See below for troubleshooting tips.

Add Shock Quick Now, Swim 15 Minutes Later
Use Shock Quick as a weekly shock treatment, and swimmers can enter the pool after just 15 minutes.

AquaGuard® 1 Lb Trichloro Shock Quick
- Dissolves Instantly
- Clears And Clarifies Pool Water
- Reduces Other Chemical Needs
- Each Packet Treats 15,000 Gallons
- Trichloro-Based Formula

116619
Pkg Of 30

AquaGuard® 1 Lb Trichloro Super Shock Quick
- Quick Chemical Boost
- Controls Algae And Bacteria
- Superconcentrated Formula
- Reduces Other Chemical Needs
- Each Packet Treats 24,000 Gallons

116647
Pkg Of 24

AquaGuard® 50 Lb Sodium Persulfate Non-Chlorine Shock
- Eliminates Odor And Oxidizes Organic Buildup
- Does Not Affect Chlorine Levels, So Swimmers Can Enter Pool Immediately After Application
- Helps Clarify Water And Improve Filtration

116621

AquaGuard® 1 Lb Calcium Hypochlorite Shock
- 59.5% Calcium Hypochlorite
- Swimming Pool Water Oxidizer
- Great For Shocking Swimming Pool Water
- Kills Bacteria, Destroys Organic Contaminants, Controls Algae
- Convenient 1 Lb Bags
- Brand May Vary By Region
Mfg #REF-50-1225

114009
Case Of 24

TROUBLESHOOTING TIPS

CLOUDY WATER - Clarifiers (116630 and 116631) will aid in removing particles, but the source of the problem should also be determined.

1. Check filtration system for malfunction.

2. Test pH and total alkalinity and adjust if necessary. Adjust alkalinity with Alkalinity Booster (116602/116636). Adjust pH using pH Up (116600/116636) or pH Down Dry Acid (116601).

3. If total alkalinity and pH are correct, shock pool water with Shock Quick Pouch (116619/116647) or Non-Chlorine Shock Treatment (116621) and run the pump on a longer cycle.

EYE/SKIN IRRITATION - pH is out of proper range.

1. Test pH and adjust using pH Up (116600/116636) or pH Down Dry Acid (116601).

2. If pH is correct, shock pool water with Shock Quick Pouch (116619/116647) or Non-Chlorine Shock Treatment (116621) and run the pump on a longer cycle.

CHLORINE ODOR - Chloramines present due to inadequate levels of free chlorine.

1. Test pH and adjust using pH Up (116600/116636) or pH Down Dry Acid (116601).

2. Shock pool water with Shock Quick Pouch (116619/116647) or Non-Chlorine Shock Treatment (116621) and run the pump on a longer cycle.

GREEN ALGAE - Caused by inadequate chlorine levels.

1. Brush algae off pool surfaces.

2. Test pH and adjust using pH Up (116600/116636) or pH Down Dry Acid (116601).

3. Shock pool water with Shock Quick Pouch (116619/116647) or Non-Chlorine Shock Treatment (116621), using three times the normal shock dosage.

4. Run the pump on a longer cycle.

5. Treat with Green Algaecide (116625).

H·D SUPPLY®

1.800.431.3000   En español 1.800.511.5652

4 STEP

Algaecides work hand in hand with chlorine and shock treatments to prevent and remove algae and bacteria buildup.

To treat algae, you must first identify the type of algae present, and then use the task-specific algaecide to prevent or treat the problem.

When To Apply Algaecides:
- When visible algae is present
- As part of a routine maintenance program
- Prior to the start of pool season

Salt Pool Compatible

Treats the following:

See below for troubleshooting tips.

AQUA GUARD®
5-Step Pool Care System

SELECT ALGAE CONTROL BASED ON THE TYPE OF ALGAE

AquaGuard® 1 Gallon Algaecide And Clarifier
- Ready-To-Use
- Combination Algaecide And Clarifier For All Pool Types
- Treats Up To 53,000 Gallons (Per Gallon)
- Nontoxic, Nonfoaming
116623
Case Of 6

AquaGuard® 1 Gallon Green Algaecide
- Concentrated Formula
- Most Effective Against Green Algae
- Treats Up To 320,000 Gallons
- Nontoxic, Nonfoaming
116625

AquaGuard® 1 Gallon Phosphate Remover
- Concentrated Formula
- Eliminates Phosphates, Which Are The Food Source For Algae
- Impedes The Ability Of Algae To Grow
116627

AquaGuard® 10 Lb Black Algaecide
- Highly Concentrated Formula
- Most Effective On Black Algae
- Slow-Dissolving
- Will Not Raise pH
116628

AquaGuard® 1 Gallon 60% Algaecide
- Concentrated Formula
- Top-Selling Premium Algaecide In The Industry
- Nontoxic, Nonfoaming, Nonmetallic, Poly Blend
- Treats And Prevents All Types Of Algae
116624

AquaGuard® 1 Gallon Mustard Algaecide
- Concentrated Formula
- Effective For Treatment And Prevention Of Mustard Algae
- Treats Up To 256,000 Gallons
116626

TROUBLESHOOTING TIPS

BROWN/MUSTARD ALGAE - Appears in patches. It brushes away easily, but reappears quickly.

1. Brush algae off pool surfaces.
2. Test pH and adjust using pH Up (116600/116636) or pH Down Dry Acid (116601).
3. Shock pool water with Shock Quick Pouch (116619/116647) or Non-Chlorine Shock Treatment (116621), using three times the normal shock dosage.
4. Run the pump on a longer cycle.
5. Treat with Mustard Algaecide (116626).

BLACK ALGAE - Appears as black spots. **Note: These instructions and Black Algaecide may only be used on unpainted, concrete-type pools.**

1. Brush pool surfaces with wire algae brush.
2. Test pH and adjust using pH Up (116600/116636) or pH Down Dry Acid (116601).
3. Shock pool water with Shock Quick Pouch (116619/116647) or Non-Chlorine Shock Treatment (116621), using three times the normal shock dosage.
4. Run the pump on a longer cycle.
5. Treat with Black Algaecide (116628) and use Algaecide 60% Concentrate (116624) for maintenance.

BLUE/GREEN WATER - Water looks blue/green.

1. Test pH and adjust using pH Up (116600/116636) or pH Down Dry Acid (116601).
2. Use Ultra Clarifier (116631) and vacuum any fallout to avoid staining.

SAFE FOR SALTWATER POOLS

All AquaGuard® chemicals are compatible with saltwater systems.

HD SUPPLY

5

Clarifiers keep your pool crystal clear by combining small particles into large ones for easy filter removal.

When To Use Clarifiers:
- When water is cloudy
- After algaecide treatment
- Prior to the start of pool season

Salt Pool Compatible

Treats the following:

See pages 4-5 for troubleshooting tips.

AQUA GUARD®
5-Step Pool Care System

AquaGuard® 1 Gallon Spa Water Defoamer
- Eliminates And Prevents Foaming In Spas When Spa Jets Are In Use
- Safe For All Types Of Spas
116634

AquaGuard® 1 Gallon Ultra Pool Water Clarifier
- Clears Cloudy Water
- Use 2 Oz Per 10,000 Gallons
116631

AquaGuard® 1 Gallon Pool Water Clarifier
- Treats Cloudy Or Discolored Water
- Settles Particles To Pool Bottom For Easy Vacuuming And Filtration
116630

AquaGuard® 1 Gallon Tile And Spa Cleaner
- Dissolves Scale And Oils On Ceramic, Porcelain And Fiberglass Pools
- Clings To Surfaces For Easy Cleaning
- Easy Rinse Formula
116632

Super-Concentrated Formula Treats Up To 640,000 Gallons

AquaGuard® 1 Gallon Filter Cleaner And Degreaser
- Safe For All Types Of Filters
- Removes Grime, Oil And Organics
- Helps Restore Filter Efficiency
116633

IMPROVE YOUR POOL CARE SKILLS WITH OUR TRAINING CLASSES

PHTA® Certified Pool Operator® Certification Class*
Learn the skills to maintain your pool and eliminate expensive outsourcing costs. Upon successful completion of this in-depth, two-day course, you will earn a certification that is recognized by the Pool & Hot Tub Alliance (PHTA®, formerly NSPF® and APHA®). HD Supply provides the training and proctors the exam.

Topics Covered
- Pool calculations and formulas
- Chemical dosage formulas
- Disinfection (superchlorination)
- Water chemistry and balancing
- Filtration
- Pool safety standards
- Identifying pool hazards
- Understanding federal and state codes

*Course fees apply. A passing score of 75% is required to receive certification.

Swimming Pool Maintenance Class
Learn how to professionally manage and maintain one of your property's most valuable amenities—the swimming pool. This three-hour class is designed to give you an overview of daily pool operations and attendance is free.

Topics Covered
- Chemical testing and water balance
- Filtration systems and mechanical maintenance
- Liability and safety aspects of pool management
- Chemical safety

For more information, visit **hdsupplysolutions.com/training** or call **1.800.431.3015, ext. 12465**.

SALTWATER POOL CARE

Saltwater pools rely on salt chlorine generators for sanitization, minimizing the amount of chemicals and chloramine buildup in the water. AquaGuard® Balance, Clarify, Algae Control, and Shock chemicals are compatible with saltwater systems.

How To Maintain A Saltwater Pool:

- Test pool water weekly for free chlorine and pH levels
  - Free chlorine levels should be within 2.0-4.0 ppm
  - Optimal pH level should be within 7.4-7.6
- Use test strips monthly to test pool water for salt, alkalinity, stabilizer, and calcium
- Open and visually inspect cell every three months for maximum performance
- Ensure filter, pump, and skimmer are clean
- Make sure water flow is at optimal levels

All AquaGuard® chemicals are compatible with saltwater pools.

AQUA GUARD®
5-Step Pool Care System

AQUA GUARD®
AquaGuard® 40 Lb Pool Salt
- For Use In Pools And Spas With Salt Chlorinators
- Brands May Vary By Region
- Not Available In All Markets

WATER TESTING

We recommend testing commercial pools daily. Be sure to test pH levels, chlorine, total alkalinity, calcium hardness, and more. Enter your results into our online Pool Water Testing Tool for product recommendations and dosing instructions: **hdsupplysolutions.com/poolwatertesting**

Recommended Levels:

- pH: 7.4-7.6
- Chlorine: 2.0-4.0 ppm
- Total Alkalinity: 80-120 ppm
- Calcium Hardness: 200-400 ppm

Test Kit Storage Tips

Test kit reagents typically last one season and cannot be mixed with another test kit. Be sure to store in a cool, dark location for longer shelf life.

M	114205	2 HP Square Flange Pool Replacement Motor - Full-Rated - Single Phase - 230 Volt - Service Factor Of 1.3 - Total Output=2.60 HP - Mfg #B748

H - M

IMPORTANT NOTE: Always replace the pump seal (114528) when installing a new motor to avoid severe damage to system.

FOR YOUR INFORMATION

Up-Rated? Full-Rated?

Which one do you choose? Motors are rated to operate to listed capacity. When replacing a pump and/or motor on an existing system, it is important to use the correct replacement. That can easily be accomplished by checking your currently installed equipment. Find the motor's nameplate. Locate the HP (horsepower) shown on the nameplate and multiply that by the SF (service factor) shown on the nameplate. The HP times the SF of the replacement motor must be equal to (or greater) than HP times SF of the motor being replaced.

Total Output = Nameplate Horsepower x Service Factor

- Removable And Adjustable Footrest
- Submergible 2-Button Remote
- 24 Volt Rechargeable Battery And Charger Included
530370

ADA POOL LIFTS

We carry ADA-compliant pool lifts from the leading national brands, including SR Smith and Aqua Creek.

ADA POOL COMPLIANCE

Any pool open to the public must comply with ADA pool lift regulation.

ADA Regulations:

- ADA requires an accessible means of entry or exit for people with disabilities. (This is a requirement for hospitality properties.)
- Pools with less than 300 linear feet of pool wall must provide one means of access
- Pools with more than 300 linear feet of pool wall must provide two means of access

Maintenance Tips

Routine lift maintenance and cleaning are essential for ensuring accessibility. Be sure to:

- Check and charge battery daily
- Test for normal operation
- Inspect for lift damage
- Clean seat, lift, etc. regularly
- Lubricate all gears on a monthly basis
- Inspect cable connections on a monthly basis
- Use a lift cover when not in use and avoid storing lift near pool chemicals
