hpsupplysolutions.com Thank You for Your Business!
The completeness and usability of all first aid supplies. Any supply beyond its marked expiration date should be replaced. For a variety of operations, employers may find that additional first aid supplies and kits are needed.

**ANSI Class A**

**ANSI Class B**
Brand New items added to meet ANSI requirements

“Mouth-to-Mouth Barrier” must be 510K device

Eye Wash is a Snap-Off Top to Prevent Cross-Contamination

Hand Sanitizer is now Mandatory

Cold Compress Instantly Activates and Lasts for 20 Minutes

All of these items must be added to your current first aid kit in order to meet the new ANSI requirement - Reference Page 3
 ✓ Heat Stress Kits are important to any work area. Designed to bring down body temperature and to avoid heat stroke
 ✓ iXL Elite Hydration (Supplemental) Contains Zero Sodium, 400mg Potassium for electrolyte replenishment
 ✓ Elovate Glucose SlimPak (Supplemental) Protects the 1-in-12 people that are diabetics - *Lows can be Fatal*
 ✓ Hemostatic Agent (Supplemental) Coagulates the blood in seconds
 ✓ Providing Burn treatment when seconds count will go a long way in easing the injury and pain of the victim

 ✓ First Aid Kits no longer designated by “Number of Persons” that it will serve. Class A for *Common* Work Injuries and Class B for *High Risk* Injuries
 ✓ Class A and Class B Kits are Gasketed and Weather Resistant
 ✓ Save-A-Tooth® is the only tooth saving system scientifically proven to work, and has been FDA approved and received the ADA (American Dental Association) seal of acceptance. Teeth begin to die within 15 minutes of being knocked out of the mouth, but a Save-A-Tooth® will keep that tooth alive and undamaged for up to 24 hours

Appendix B Guidelines

ANSI/ISEA Z308.1-2015

Appendix B (informative)
Guidance on Ongoing Maintenance, Other First Aid Supplies and Unitized Kits

B.1 Ongoing Maintenance of First Aid Kits

First aid kits should be frequently inspected to ensure the completeness and usable condition of supplies in order to maintain compliance with this standard. Any supply beyond its marked expiration date should be replaced.

B.2 Supplemental First Aid Supplies for Consideration - Applicable Environments

It is recognized that each work environment is unique and it is expected that a first aid kit containing the minimum required first aid supplies will be augmented with additional items or additional qualities of required supplies based upon the specified hazards existing in a workplace environment. The selection of such items should be based on the recommendation and consultation of a person competent in first aid and cognizant of the hazards and on the number of people found in the workplace. Federal, state and local requirements should be consulted, where appropriate. Augment kits with the following first aid supplies, as applicable:

<table>
<thead>
<tr>
<th>FIRST AID SUPPLY</th>
<th>PURPOSE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low dose aspirin</td>
<td>Used to treat suspected heart attack</td>
</tr>
<tr>
<td>Hemostatic agent</td>
<td>For individuals with compromised clotting or uncontrollable bleeding</td>

<td>Analgesics (oral and/or topical)/anti-inflammatory</td>
<td>Pain management; swelling control</td>
</tr>
<tr>
<td>Hydrocortisone</td>
<td>Itchiness and skin-related reactions including rashes</td>
</tr>
<tr>
<td>Antihistamine</td>
<td>Allergic reactions</td>
</tr>
<tr>
<td>Foil blanket</td>
<td>Treat shock and/or cold stress related injuries</td>
</tr>
</tbody>
</table>

B.3 Unitized Kits

Unitized first aid kits contain first aid supplies arranged in uniform-sized, color coded boxes, in an effort to simplify the organization and restocking of the kit. Color coding of such items is noted below:

- Blue - Antiseptics
- Yellow - Bandages
- Red - Burn Treatments
- Orange - Personal Protective Equipment (PPE)
- Green - Miscellaneous

For more than 55 years, Certified Safety Mfg. has been bringing First Aid and Safety Products to the workplace. Our commitment is to provide quality products and prompt service as well as friendly and knowledgeable customer service. We will continue to be innovative with new products and listen to your ideas.

Certified Safety is world wide with distributors in many countries as well as in every major city in America.

The variety of quality items we produce has made us the #1 growing manufacturer in our industry. All of our products, where applicable, meet and/or exceed the guidelines set forth by OSHA and ANSI/ISEA standards as outlined in Section Z308.1.2015 and Federal Specification GG-K391(a). Since Certified Safety is a manufacturer and not a “kit re-packager,” we are regulated by the FDA to meet and follow the rules set forth by cGMP (current Good Manufacturing Practices).

Beyond meeting and exceeding standards, we continually research new ways to innovate and manufacture better quality products. Our patented CPRotector (US Patent #5562093), the “Mouth-to-Mouth Barrier,” is second to none. We can customize for you and/or your customers and provide every variety of First Aid kit you can imagine.

We take pride in providing American made products and being a “one-stop shop.”

U.S.A. Manufacturer of High Quality FIRST AID Products
