# Safety Data Sheet

according to OSHA Hazard Communication 29 CFR Part 1910.1200

#### Section 1. Identification

Identification Number:	8-0950				
Product Name:	MAJ CATALYST HARDENER				
Product Use/Class:	Hardner Additive	Hardner Additive			
SUPPLIER:		MANUFACTURER:			
Yenkin-Majestic Paint Corporation 1920 Leonard Avenue Columbus, OH 43219		Yenkin-Majestic Paint Corporation 1920 Leonard Avenue Columbus, OH 43219			
CHEMTREC 1-800-424-9300 24 Hr. Emergency Hotline		CHEMTREC 1-800-424-9300 24 Hr. Emergency Hotline			
Safety Data Sheet Coordinator:	J. Michael Jacobs (614) 253-851	1			

#### Section 2. Hazard(s) Identification

**EMERGENCY OVERVIEW:** Harmful if inhaled. Vapors irritating to eyes and respiratory tract. FLAMMABLE liquid and vapor. May cause allergic skin reaction. May cause delayed lung damage. May cause allergic respiratory reaction. Toxic gases given off during burning or thermal decomposition. If left untreated corneal damage can occur and injury is slow to heal, however, damage is usually reversible.

#### **GHS Classification**

Acute Tox. Inhalation 3, Carc. 2, Eye Irrit. 2, Flam. Liq. 3, Resp. Sens. 1, Skin Irrit. 2, Skin Sens. 1, STOT SE 3 NE, STOT SE 3 RTI

#### Symbol(s) of Product

Signal Word Danger

#### **Possible Hazards**

OUD UN ZADD OTATEMENTO

58% of the mixture consists of ingredients of unknown acute toxicity

GID HAZARD STATEMENTS		
Flammable Liquid, category 3	H226	Flammable liquid and vapor.
Skin Irritation, category 2	H315	Causes skin irritation.
Skin Sensitizer, category 1	H317	May cause an allergic skin reaction.
Eye Irritation, category 2	H319	Causes serious eye irritation.
Acute Toxicity, Inhalation, category 3	H331	Toxic if inhaled.
Respiratory Sensitizer, category 1	H334	May cause allergy or asthma symptoms or breathing difficulties if inhaled.
STOT, single exposure, category 3, RTI	H335	May cause respiratory irritation.
STOT, single exposure, category 3, NE	H336	May cause drowsiness or dizziness.
Carcinogenicity, category 2	H351	Suspected of causing cancer. Classified as Category 2 based on limited evidence on human and/or animal studies.

#### PRECAUTIONARY STATEMENTS: DISPOSAL

P501	Dispose of contents/container according to applicable local, national, and international regulations.			
PRECAUTIONARY STATEMENTS: PR	EVENTION			
P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.			
P233	Keep container tightly closed.			
P240	Ground/bond container and receiving equipment.			
P241	Use explosion-proof electrical/ventilating/lighting equipment.			
P242	Use only non-sparking tools.			
P243	Take precautionary measures against static discharge.			
P261	Avoid breathing dust/fume/gas/mist/vapors/spray.			
P264	Wash skin thoroughly after handling.			
P271	Use only outdoors or in a well-ventilated area.			
P272	Contaminated work clothing should not be allowed out of the workplace.			
P280	Wear protective gloves/protective clothing/eye protection/face protection.			
P285	In case of inadequate ventilation wear respiratory protection.			
PRECAUTIONARY STATEMENTS: RE	SPONSE			
P302+P352	IF ON SKIN: Wash with plenty of soap and water.			
P303+P361+P353	IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with			
	water/shower.			
P304+P340	IF INHALED: Remove person to fresh air and keep comfortable for breathing.			
P304+P341	IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing.			
P305+P351+P338	F IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.			
P312	Call a POISON CONTROL CENTER/doctor if you feel unwell.			
P321	Specific treatment (see supplemental first aid instruction on this label).			
P332+P313	If skin irritation occurs: Get medical advice/attention.			
P333+P313	If skin irritation or rash occurs: Get medical advice/attention.			
P337+P313	If eye irritation persists: Get medical advice/attention.			
P342+P311	If experiencing respiratory symptoms: Call a POISON CONTROL CENTER or doctor.			
P363	Wash contaminated clothing before reuse.			
P370+P378	In case of fire: use recommended media to extinguish.			
PRECAUTIONARY STATEMENTS: ST	ORAGE			
P403+P233	Store in a well-ventilated place. Keep container tightly closed.			
P403+P235	Store in a well-ventilated place. Keep cool.			
P405	Store locked up.			
Section 3. Composition/Infor	mation on Ingredients			

Chemical Name	CAS-No.	<u>Wt. %</u>	GHS Symbols	GHS Statements

Section 4. First-Aid Measures				

FIRST AID - INHALATION: Move to an area free from risk of further exposure. Administer oxygen or artificial respiration as needed. Obtain medical attention. Asthmatic-type symptoms may develop and may be immediate or delayed up to several hours. Treatment is essentially symptomatic.

FIRST AID - SKIN CONTACT: In case of contact, immediately flush skin with plenty of water while removing contaminated clothing and shoes. Get medical attention immediately. Wash clothing separately before resuse.

FIRST AID - EYE CONTACT: In case of contact, immediately fillsh eyes with plenty of water for at least 15 minutes. If easy to do,

#### remove contact lens, if worn.

**FIRST AID - INGESTION:** If swallowed, do NOT induce vomiting. Give victim a glass of water or milk. Call a physician or poison control center immediately. Never give anything by mouth to an unconscious person.

**MOST IMPORTANT SYMPTOMS:** Isocyanate vapors or mist at concentrations above the exposure limits or guidelines can irritate (burning sensation) the mucous membranes in the respiratory tract (nose, throat, and lungs) with symptoms of runny nose, sore throat, coughing, chest discomfort, shortness of breath, and reduced lung function (breathing difficulty). Persons with a preexisting, nonspecific bronchial hyperractivity can respond to concentrations below the limits or guidelines with similar symptoms as well as asthma attack or asthma-like symptoms. Exposure well above the exposure limits or guidelines may lead to bronchitis, bronchial spasm, and pulmonary edema (fluid in lungs). Chemical or hypersensitivity pneumonitis with flu-like symptoms (e.g. fever, chills) have also been reported. These symptoms can be delayed up to several hours after exposure. These effects are usually reversible. May cause skin irritation with symptoms of reddening, itching, and swelling. Can cause sensitization. Persons previously sensitized can experience allergic skin reaction with symptoms of reddening, itching, swelling, and rash. Cured material is difficult to remove. May cause eye irritation with symptoms of burning and tearing. May cause irritation of the digestive tract; Symptoms may include abdominal pain, nausea, vomiting, and diarrhea.

**INDICATION OF IMMEDIATE MEDICAL ATTENTION IF NECESSARY:** If symptoms persist call a poison control center or a doctor/physician.

#### Section 5. Fire-Fighting Measures

**UNUSUAL FIRE AND EXPLOSION HAZARDS:** Closed container may forcibly rupture under extreme heat or when contents are contaminated with water (CO2 formed). Use cold-water spray to cool fire-exposed containers to minimize the risk of rupture. Large fires can be extinguished with large volumes of water applied from a safe distance, since reaction between water and hot diisocyanate can be vigorous. "EMPTY CONTAINERS" retain product residue (liquid and/or vapor) and can be dangerous.

**SPECIAL FIREFIGHTING PROCEDURES:** As in any fire, wear self-contained breathing apparatus (MSHA/NIOSH approved or equivalent) and full protective gear. Firefighters should wear NFPA compliant structural firefighting protective equipment, including selfcontained breathing apparatus and NFPA compliant helmet, hood, boots and gloves. Avoid contact with product. Decontaminate equipment and protective clothing prior to reuse. During a fire, isocyanate vapors and other irritating, highly toxic gases may be generated by thermal decomposition or combustion. Exposure to heated diisocyanate can be extremely dangerous.

EXTINGUISHING MEDIA: Alcohol Foam, Carbon Dioxide, Dry Chemical, Foam

#### Section 6. Accidental Release Measures

PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT, AND EMERGENCY PROCEDURES: See Section 8 for details on protective equipment.

#### ENVIRONMENTAL PRECAUTIONS: No Information

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Implement site emergency response plan. Evacuate nonemergency personnel. The magnitude of the evacuation depends upon the quantity released, site conditions, and the ambient temperature. Isolate the area and prevent access of unauthorized personnel. Notify management. Call CHEMTREC at 1-800-424-9300 for assistance and advice. Wear necessary personal protective equipment (PPE) as specified in the SDS or the site emergency response plan. Ventilate and remove ignition sources. Control the source of the leak. Contain the released material by damming, diking, retaining, or diverting into an appropriate containment area. Absorb or pump off as much of the spilled material as possible. When using absorbent, completely cover the spill area with suitable absorbent material (e.g., vermiculite, kitty litter, Oil-Dri®, etc...). Allow for the absorbent material to absorb the spilled liquid. Shovel the absorbent material into an approved metal container (i.e. 55gallon salvage drum). Do not fill the container more than 2/3 full to allow for expansion, and do not tighten the lid on the container. Repeat application of absorbent material until all liquid has been removed from the surface. Decontaminate the spill surface area using a neutralization solution (see list of solutions on the SDS); scrubbing the surface with a broom or brush helps the decontamination solution to penetrate into porous surfaces. Wait at least 15 minutes after first application of the neutralization solution. Cover the area with absorbent material and shovel this into an approved metal container. Check for residual surface contamination using Swype® test kits, available from Colorimetric Laboratories, Inc. (CLI) at 847-803-3737. If the Swype® test pad demonstrates that isocyanate remains on the surface (red color on pad), repeat applications of neutralization solution, with scrubbing, followed by absorbent until the surface is decontaminated (no color change on Swype® pad). Apply lid loosely to metal waste container (do not tighten the lid because carbon dioxide gas and heat can be generated from the neutralization process). With the lid still loosely in place, move the container to an isolated, well-ventilated area to allow release of carbon dioxide. After 72 hours, seal the container, and properly dispose of the waste material and any contaminated equipment (i.e., broom or brush) in accordance with existing federal, state and local regulations.

#### Additional Spill Procedures/Neutralization

Products or product mixtures that have been shown to be effective neutralization solutions for decontaminating surfaces, tools, or equipment that have been in contact with an isocyanate includes:

· Spartan Chemical Company: 1-800-537-8990:

o Spartan® ShineLine Emulsifier Plus

o Spartan® SC-200 Heavy Duty Cleaner

- · Colorimetric Laboratories, Inc. (CLI): 1-847-803-3737
- o Isocyanate Decontamination Solution
- · Mix equal amounts of the following:
- o Mineral spirits (80%), VM&P Naphtha (15%), and household detergent (5%), and
- o A 50-50 mixture of monoethanolamine and water

In a separate container, blend the two solutions in a 1:1 ratio by volume. Immediately prior to applying this blended neutralization solution onto the contaminated surface area, mix or agitate the container to help ensure uniform mixing of the ingredients.

If the above products are not available, the following products can be obtained through retail outlets:

- · ZEP® Commercial Heavy-Duty Floor Stripper
- · Greased Lightning® Super Strength Cleaner and Degreaser
- · EASY OFF® Grill and Oven Cleaner or EASY OFF® Fume Free Oven Cleaner
- · A mixture of 50% Simple Green® Pro HD Heavy-Duty Cleaner and 50% household ammonia
- A mixture of 90% Fantastic® Heavy Duty All Purpose Cleaner and 10% household ammonia.

Note: Always wear proper PPE when cleaning up an isocyanate spill and using a neutralization solution. It may take two or more applications of the neutralization solution to decontaminate the surface. Check for residual surface contamination using a surface wipe method such as the CLI Swype® pad.

#### Section 7. Handling and Storage

HANDLING: Avoid contact with skin and eyes. Do not breathe aerosols or vapors. Warning properties (irritation of eyes, nose, throat, or odor) are not adequate to prevent chronic exposure from inhalation. This material can produce asthmatic sensitization upon either single inhalation exposure to relatively high concentration or upon repeated exposures to lower concentrations. Exposure to vapors of heated isocyanates can be extremely dangerous. Employee education and training in the safe handling of this material is required under the OSHA Hazard Communication Standard (HCS). "EMPTY CONTAINERS" retain product residue (liquid and/or vapor) and can be dangerous. DO NOT PRESSURIZE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND, OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION; THEY MAY EXPLODE AND CAUSE INJURY OR DEATH. Empty drums should be completely drained, properly bunged and promptly returned to a drum reconditioner, or properly disposed of.

**STORAGE:** Store in tightly sealed containers to prevent moisture contamination. DO NOT reseal if contamination is suspected. Avoid contact with skin and eyes. Storage temperature: -30°F (-34°C)/ 122°F (50°C). Store in containers in a dry area.

#### Section 8. Exposure Controls/Personal Protection

Ingredients with Occupational Exposu Chemical Name	re Limits <u>ACGIH TLV-TWA</u>	ACGIH-TLV STEL	<u>OSHA PEL-TWA</u>	OSHA PEL-CEILING

Legend: MEL = Maximum Exposure Limit OES = Occupational Exposure Standard SUP = Supplier's Recommendation Sk = Skin Sensitizer N.E. = Not Established

#### **Protective Measures**

**ENGINEERING CONTROLS:** Good industrial hygiene practice dictates that worker protection should be achieved through engineering controls, such as ventilation, whenever feasible. When such controls are not feasible to achieve full protection, the use of respirators and other personal protective equipment is mandated. Exhaust air may need to be cleaned by scrubbers or filters to reduce environmental contamination. Curing ovens must be ventilated to prevent emissions into the workplace. If oven off-gases are not vented properly (i.e. they are released into the work area), it is possible to be exposed to vapor. Medical Surveillance: All applicants who are assigned to an isocyanate work area should undergo a pre-placement medical evaluation. A history of eczema or respiratory allergies such as hay fever, are possible reasons for medical exclusion from isocyanate areas. Applicants who have a history of adult asthma should be restricted from work with isocyanates. Applicants with a history of prior isocyanate sensitization should be excluded from further work with isocyanates. A comprehensive annual medical surveillance program should be instituted for all employees who are potentially exposed to diisocyanates. Once a worker has been diagnosed as sensitized to any isocyanate, no further exposure can be permitted.

**SKIN PROTECTION:** The glove(s) listed below may provide protection against permeation. Gloves of other chemically resistant materials may not provide adequate protection. Nitrile gloves are recommended. Where contact is likely wear chemical resistant gloves, a chemical suit, rubber boots, and chemical safety goggles, and a face shield.

**EYE PROTECTION:** Liquid chemical goggles. Vapor resistant goggles should be worn when contact lenses are in use. In a splash hazard environment chemical goggles should be used in concert with a full face shield.

OTHER PROTECTIVE EQUIPMENT: Wear chemical resistant shoes. Rubber or plastic apron should be worn.

**HYGIENIC PRACTICES:** Wash hands before eating. Remove contaminated clothing and wash before reuse. Use only in a well ventilated area. Follow all SDS/label precautions even after container is emptied because they may retain product residues. Avoid prolonged or repeated contact with skin. Avoid breathing vapors from heated material. Avoid contact with eyes, skin, and clothing.

#### Section 9. Physical and Chemical Properties

Appearance:	Clear Liquid	Physical State:	Liquid
Odor:	Organic Solvent	Odor Threshold:	N.D.
Specific Gravity:	1.014	pH:	N.A.
Freeze Point, °C:	N.D.	Viscosity:	N.D.
Solubility in Water:	Insoluble	Partition Coefficient, n-octanol/	
Decompostion Temp., °C:	N.D.	water:	N.D.
Boiling Range, °C:	120 - 196	Explosive Limits, vol%:	0.9 - 7.6
Evaporation Rate:	Slower than Diethyl Ether	Flash Point, °C:	25.6
Vapor Density:	Heavier than air	Vapor Pressure:	N.D.

(See "Other information" Section for abbreviation legend)

#### Section 10. Stability and Reactivity

#### **REACTIVITY:** No Information

STABILITY: This product is stable under normal storage conditions.

**POSSIBILITY OF HAZARDOUS REACTIONS:** Contact with moisture, other materials that react with isocyanates, or temperatures above 350 F (177 C), may cause polymerization.

**CONDITIONS TO AVOID:** High temperatures or high humidity. Contamination with water. Contact with moisture may cause polymerization.

INCOMPATIBILITY: Water, amines, strong bases, alcohols, copper alloys.

HAZARDOUS DECOMPOSITION PRODUCTS: May produce fumes when heated to decomposition as in welding or fire. Fumes may contain: Carbon Monoxide, Carbon Dioxide, oxides of Nitrogen, traces of Hydrogen Cyanide, and isocyanate vapors or aerosols.

#### Section 11. Toxicological Information

**Practical Experiences** 

**EFFECT OF OVEREXPOSURE - INHALATION:** Isocyanate vapors or mists can irritate mucous membranes in the respiratory tract, causing runny nose, sore throat, coughing, chest discomfort, and reduced lung function. Person's with pre-existing lung conditions can respond to exposures below the exposure limits with symptoms similar to an asthma attack. Exposure well above the exposure limits may lead to bronchitis, bronchial spasms and pulmonary edema. These effects are usually reversible. These symptoms may be delayed up to several hours after exposure.

EFFECT OF OVEREXPOSURE - SKIN CONTACT: Causes skin irritation. Allergic reactions are possible. Skin sensitization may occur.

**EFFECT OF OVEREXPOSURE - EYE CONTACT:** Liquid, aerosols and vapors of this product are irritating and can cause pain, tearing, reddening and swelling accompanied by a stinging sensation and/or a feeling like that of fine dust in the eyes.

EFFECT OF OVEREXPOSURE - INGESTION: Corrosive and may cause severe and permanent damage to mouth, throat, and stomach.

PRIMARY ROUTE(S) OF ENTRY: Eye Contact, Ingestion, Inhalation, Skin Absorption, Skin Contact

#### **STOT - SINGLE EXPOSURE**

No Additional Information

#### **STOT - REPEATED EXPOSURE**

64742-95-6 Target Organs: Liver, Kidney, Central Nervous System

## Carcinogenicity: The information below indicates whether each agency has listed any ingredient as a carcinogen if present at levels greater than or equal to 0.1 %.

CAS-No.	Name	<u>NTP</u>	<u>OSHA</u>	IARC
PROPRIETARY	ISOCYANATE	Not listed by NTP	Not listed by OSHA	Not listed by IARC

#### Section 15. Regulatory Information

#### **U.S. Federal Regulations:**

#### **CERCLA - SARA Hazard Category**

This product has been reviewed according to the EPA 'Hazard Categories' promulgated under Sections 311 and 312 of the Superfund Amendment and Reauthorization Act of 1986 (SARA Title III) and is considered, under applicable definitions, to meet the following categories:

Fire Hazard, Reactive Hazard, Acute Health Hazard, Chronic Health Hazard

#### SARA SECTION 313:

This product contains the following substances subject to the reporting requirements of Section 313 of Title III of the Superfund Amendment and Reauthorization Act of 1986 and 40 CFR part 372:

#### **Chemical Name**

1,2,4 TRIMETHYLBENZENE XYLENE (HAP) ISOCYANATE CUMENE (HAP) ETHYL BENZENE (HAP)

#### TOXIC SUBSTANCES CONTROL ACT:

This product contains the following chemical substances subject to the reporting requirements of TSCA 12(b) if exported from the United States:

No TSCA 12(b) components exist in this product.

#### **U.S. State Regulations:**

#### **PENNSYLVANIA RIGHT-TO-KNOW**

The following non-hazardous ingredients are present in the product at greater than 3%. For hazardous components see Section 3.

No PA Right-To-Know components exist in this product.

#### **CALIFORNIA PROPOSITION 65 CARCINOGENS**

Warning: The following ingredients present in the product are known to the state of California to cause Cancer:

### CUMENE (HAP) ETHYL BENZENE (HAP)
