Gen-Eye SD™
Pipe Inspection/Location System

See what you've been missing – not just in sewer lines, but in your bank account. The Gen-Eye™ Pipe Inspection/ Location System is a real money maker for you, because you'll know what the problem is, where it is, and how deep to dig. It keeps your costs down, your quotes competitive, and your customers happy.

Use the Gen-Eye for in-line inspection and preventative maintenance of sewer and drain lines, septic tanks, heating and cooling ducts, crawl spaces, chimneys, attics, wells, and much more. The Gen-Eye System has everything you need to trouble shoot 1-1/2" through 12" lines. A picture could be worth a thousand dollars.

With SD Card Reader

The Gen-Eye SD™ gives you all the features of a full size video inspection system in a compact, portable package.

With an SD card reader, you can record video or still images – a one GB card records about two hours of video. Keep a copy for your records and make copies for your customers.

In addition to the card reader, the Gen-Eye SD includes an 8" LCD color monitor for crisp, clear pictures, a full keyboard for on-screen titling, on-screen distance counter, built-in voice over unit, date and time stamp, LED dimmer control, camera test port, and both AC and DC power cords. All are safely contained in a padded case weighing just 10 lbs. that can stand alone or mount on a reel.

The self-leveling color camera automatically keeps your picture right side up as the camera glides through the line. You always have an upright picture on the monitor, making it easier for you and your customers to follow the action.

The fully adjustable docking arm mounts onto a big capacity reel loaded with Gel-Rod™ push-rod and a color self-leveling camera. With this easily maneuverable, all-in-one package you're set to trouble-shoot 3" to 10" lines. You can even mount the SD onto a mini reel to inspect 2" to 4" lines.

Skid designs

Skids keep the camera centered in the pipe for a better view, while reducing drag on longer runs. Standard systems include both 3" and 6" trap skids that protect the camera from abrasion as it slides through cast iron traps. Optional 3-in-1 skid set for 4", 6" and 8" lines, and Universal Roller Skid for 6" to 12" lines are also available.

Built-in voice over unit
Internal microphone and on/off switch lets you add commentary to your videos.

Built-in AC/DC converter
Allows you to operate in the field with truck power alone.

SD Card Reader
Records video or still images. One GB card records about two hours of video.

Date and Time Stamp
You can document the date and time of each job for your records.

On-screen distance counter
Lets you keep track of how much push rod you've fed into the line.

Titler with full keyboard
You get up to nine pages of text to add your company name and job location to each video you make.

Other features include Internal 512 Hz transmitter, dimmer control, camera test port, 3" and 6" trap skids, and storage compartment for power cord, camera tool, and remote controls.

Flexibility, Strength, Durability

A tough, Gel-Rod® push-rod protects against moisture damage if the rod is cut or abraded. Its Kevlar® braid, fiberglass core, and durable sheath provide for maximum pushing and pulling power.

Big capacity reels

The full size reel holds 200 ft., 300 ft., or 400 ft. of push-rod on a sturdy frame and takes up little space in your truck. Eight inch wheels ensure easy transport to and from the job. The mini reel carries 100 ft. or 200 ft. of push-rod in a compact frame for easy handling without taking up too much room in your truck.

Gen-Eye SD Units

SD-500	Gen-Eye SD Command Module, complete with SD Card Reader, 8" LCD Screen, and Full Keyboard.
