Coreless Tissue Systems

Compact® tissue gets a green light

An ever-growing number of eco-sensitive companies are embracing our Compact® dispensers and coreless tissue systems to help reduce their environmental footprint. This innovative line of dispensers is also saving them time and money by helping minimize roll changes and storage costs.

Compact dispensers offer multiple solutions to accommodate the needs of any facility. Available in Splash Blue, Translucent Smoke, Translucent White, Stainless Steel and Stainless Finish.

Our coreless Compact® tissue solutions can make 119 tons of paper and packaging disappear from your waste stream each year*

*Based on using 28,000 cases of coreless tissue per year.

These products are part of Georgia Pacific's sustainability platform – innovative products that both reduce environmental impact and improve operational efficiencies.

Reduce

Reducing waste has an immediate effect on the environment.

Georgia-Pacific Professional is the number one producer of systems that reduce use and waste by encouraging users to take just the paper they need.

Reuse

Georgia-Pacific finds innovative ways to reuse the by-products of the paper making process for production and packaging. We

recycle and reuse water throughout multiple stages in our mills. In addition, some of our by-products are used to help make grass grow, build roads and provide a strong foundation for highways.

Recycle

Georgia-Pacific Professional's reclaimed paper production generates less pollution than virgin paper production and

fibers can be reused for repeated environmental savings. In 2000, we purchased GP Harmon Recycling to facilitate the brokerage of 6-million tons of recovered paper, over 10% of the U.S. wastepaper supply.

The Compact® tissue case study

At Georgia-Pacific, we're committed to providing you with innovative dispenser solutions. The fact is that no one invests more time and effort in the coreless dispensing platform than we do. Our Compact dispensers and bath tissue provide a perfect example: These products eliminate 95-percent of the packaging waste associated with standard bath tissue. The bottom line is that each case of Compact coreless bath tissue can eliminate as much as 7.8 pounds of waste when compared to using a case of Georgia-Pacific standard roll bath tissue.

The environmental facts

Compact® coreless tissue helps reduce waste by eliminating roll cores, cardboard shipping boxes and individual product wrapping. Compact® coreless tissue will also cut your storage requirements by up to 50 percent by eliminating bulky cardboard packaging.

Compact benefits our environment

Compact coreless tissue systems help minimize your impact on the environment by using recycled fiber and helping to reduce waste

Meets EPA guidelines

Our coreless tissue meets EPA guidelines for post-consumer fiber content

Near 100% utilization

Reduces and can help eliminate stub roll waste through dispensing solutions that require complete roll usage

One Case of Waste—
Compact vs. Standard Roll
Bath Tissue

Environmental Facts

Save more with four

Compact Quad[®] dispensers maximize your reduction efforts and your savings. Compact Quad[®] is the ultimate tissue dispenser for high traffic areas, such as office buildings, sports stadiums, or tourist attractions.

Higher capacity

Holds four large-diameter coreless rolls

Dispenses up to 6,000 2-ply sheets or 12,000 1-ply sheets between refills

Helps minimize tabbing

Rolls face forward for easy access

Dependable

Roll-advancing system

Sleek and stylish

Available in Splash Blue, Translucent Smoke, Translucent White, Stainless Steel and Stainless Finish

Easily installed

Mounts on all washroom surfaces in minutes

Easy to swap

Mounting holes are identical to Compact Vertical and Compact Side-by-Side High Capacity Dispensers

More green options, more green flexibility

Angel Soft ps[®] Compact[®] tissue gives you a new and softer EPA Compliant option for recycled fiber. It delivers the same environmental benefits of our traditional Compact coreless bath tissue with improved two-ply softness. Angel Soft ps Compact rolls contain a minimum of 20 percent post-consumer recycled fiber. And one case will eliminate 95 percent of standard tissue packaging waste by eliminating cores, corrugated boxes, and individual roll wrapping. Angel Soft ps Compact even lowers building management costs by increasing operational efficiency. This high-density product helps reduce storage needs by up to 50 percent and lowers your cost per roll.

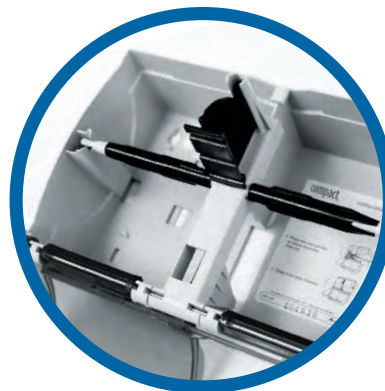

Compact[®] Vertical Dispenser

Controls labor costs by dispensing two large diameter coreless bath tissue rolls that allow for nearly 100% utilization

Sleek and sanitary design that minimizes the chance of placing unsanitary objects on top of dispenser

Perfect companions

Combine Compact[®] stainless tissue dispensers with the stainless enMotion[®] towel and soap dispensers for a high-end cohesive look

Improved spindle design makes loading rolls easier

Compact Side-by-Side Dispenser

Controls labor costs by dispensing two large diameter coreless bath tissue rolls that allow for nearly 100% utilization

Upgrades maximize operational efficiencies

Unique locking cabinet prevents theft

Compact® products offer flexibility to meet the needs of any customer application
