Tool Holder

LOCK JAW™

Brushes • Trim Rollers • Flashlights • Scrapers • Roller Frames • Sanders • Dusters

Sometimes an extension pole is not enough. If tools don't have threads for pole use, or they can't reach odd angles at a height, the Wooster Lock Jaw tool holder is the key to success! The patent-pending design adjusts in 15-degree increments to cover all planes of a surface. It fastens tools very securely to avoid loosening and downtime. Made of durable, engineering-grade plastics, the Lock Jaw tool holder works with threaded and Sherlock GT® extension poles.

Locks in 8 positions, range of 150 degrees—fully adjustable for virtually any angle!
