

Common Features

- 20" top mesh
- Nickel-plated brass grommets
- 100% polyester fabric
- Inherently fire retardant materials that meet the requirements of NFPA 701 small scale and California Section 13115
- Machine washable and dryable (must follow directions)
- If installed properly, privacy curtains satisfy F-Tag 460 for full visual privacy

Useful Information

FLOOR GAP

This measurement (the gap between the floor and the curtain) should be 18" or less. The best rule is ceiling height minus 18 inches.

MESH HEIGHT

Fire code stipulates that the curtain fabric needs to be suspended from the ceiling in a manner that will allow the fire sprinklers to spray across the top of the fabric barrier. This can be done with suspended track, PVC drops, chain drops, or mesh.

MESH SPACING

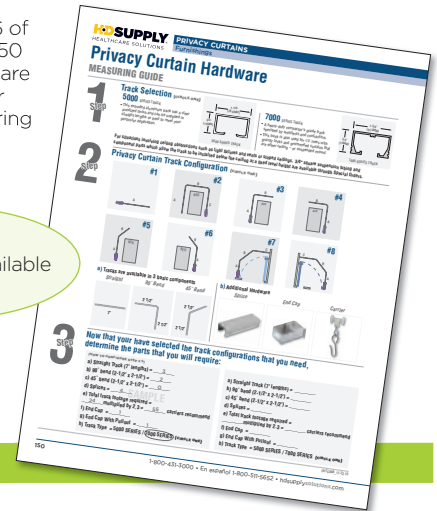

Code requires 1/2" holes in the mesh to ensure a compliant flow of water from fire sprinklers through the weave.

PRIVACY GAPS

Sanctioning bodies require that cubicle curtains cover all patient privacy gaps, including gaps that can be seen through room windows, alternate doorways, and any position in the room interior.

Measuring Guidelines

See page 1686 of V64 or page 150 of our Healthcare Catalog V9 for simple measuring and ordering guidelines.

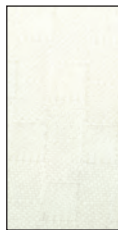

Custom Sizes Available

Parallel Series | Sapphire Series | Nontron and Ginkgo Series

Available in 84-inch heights and 72, 108, 144, 180, and 216-inch widths (6, 9, 12, 15, and 18-foot widths). See V64, page 1688, or our Healthcare Catalog V9, page 146.

Sage

Pearl

Wedgewood

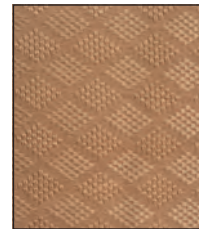

Available in 84-inch height and 108, 144, and 180-inch widths (9, 12, and 15-foot widths). See V64, page 1689, or our Healthcare Catalog V9, page 147.

Pearl

Fresh Leaf

Harvest

Cobblestone

Nontron and Ginkgo Series

Unique Antimicrobial Finish

- Effective against C. diff, E. coli, and MRSA
- Long-lasting nontoxic, nonchemical protection
- Tested effective for 100+ washings
