1. Identification

Product identifier: DPD Reagent #2
Product code: R-0002
Recommended use: Use as directed by manufacturer for purposes directly related to water testing.
Recommended restrictions: None known

Manufacturer/Importer/Supplier/Distributor information

Manufacturer

Company name: Taylor Technologies, Inc.
Address: 31 Loveton Circle
           Sparks, MD 21152
           United States
Telephone: (410) 472-4340
           Monday–Friday, 8:00 a.m.–4:30 p.m.
Website: www.taylortechnologies.com
E-mail: Not available
Emergency phone number: (800) 837-8548

2. Hazard(s) identification

Physical hazards: This mixture does not meet the classification criteria according to OSHA HazCom 2012.

Health hazards:
- Eye damage/irritation: Category 1
- Skin corrosion/irritation: Category 1

Environmental hazards: Not currently regulated by OSHA; refer to section 12 of the SDS for additional information.

Label elements

Signal word: Danger
Hazard statement: Causes severe skin burns and eye damage.
Precautionary statement

Prevention: Wear protective gloves/protective clothing/eye protection/face protection. Do not breathe mist. Wash skin thoroughly after handling.

Response
- IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.
- IF ON SKIN (OR HAIR): Take off immediately all contaminated clothing. Rinse skin with water.
- Wash contaminated clothing before reuse.
- IF INHALED: Remove person to fresh air and keep comfortable for breathing. Immediately call a physician or poison control center.
- IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. Immediately call a physician or poison control center.

Storage: Store locked up.
Disposal: Dispose of contents/container in accordance with local/regional/national/international regulations.
Hazard(s) not otherwise classified
May cause pulmonary edema (fluid accumulation). Symptoms of pulmonary edema (chest pain, shortness of breath) may be delayed. Ingestion may produce burns to the lips, oral cavity, upper airway, esophagus, and possibly the digestive tract.

Supplemental information
None

4. First-aid measures

Inhalation
Move to fresh air. Give oxygen or artificial respiration if needed. Get medical attention immediately.

Skin contact
Immediately flush skin with running water for at least 20 minutes. Immediately take off all contaminated clothing. Call a physician or poison control center immediately. Chemical burns must be treated by a physician. Wash contaminated clothing before reuse.

Eye contact
Immediately flush eyes with plenty of water for at least 20 minutes. Remove contact lenses if present and easy to do. Continue rinsing. Call a physician or poison control center immediately.

Ingestion
Call a physician or poison control center immediately. Rinse mouth. Never give anything by mouth to a person who is unconscious or is having convulsions. Do NOT induce vomiting unless directed by physician. If vomiting occurs, keep head low so that stomach content does not get into the lungs.

Most important symptoms/effects, acute and delayed
Direct skin contact may cause corrosive skin burns, deep ulcerations, and possibly permanent scarring. Direct contact with concentrated solutions may be corrosive to the eyes and may cause severe damage, including blindness. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

Inhalation of mists can cause severe respiratory irritation. Symptoms may include coughing, choking, and wheezing. Inhalation could result in pulmonary edema (fluid accumulation). Symptoms of pulmonary edema (chest pain, shortness of breath) may be delayed.

Ingestion may produce burns to the lips, oral cavity, upper airway, esophagus, and possibly the digestive tract. Symptoms may include abdominal pain, vomiting, burns, perforations, bleeding.

Indication of immediate medical attention and special treatment needed
Provide general supportive measures and treat symptomatically.

Chemical burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital. Keep person under observation. Symptoms may be delayed.

General information
Ensure medical personnel are aware of the material(s) involved and take precautions to protect themselves.

5. Firefighting measures

Suitable extinguishing media

Unsuitable extinguishing media
Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical
During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters
Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Firefighting equipment/instructions
Firefighters should wear full protective gear. Evacuate the area promptly. Fight fire from upwind to avoid exposure to combustion products. Cool containers/tanks with water spray. Do not get water inside container. Move containers from fire area if it can be done without risk. Prevent fire-extinguishing water from contaminating surface water or the ground water system.
Specific methods
Use standard firefighting procedures and consider the hazards of other involved materials.

General fire hazards
Not combustible; however, the product can react with metals to form flammable and explosive hydrogen gas.

Hazardous combustion products

6. Accidental release measures

Personal precautions, protective equipment, and emergency procedures
Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Wear appropriate protective equipment and clothing during cleanup. Do not breathe mist or vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protective equipment, refer to section 8 of the SDS.

Methods and materials for containment and cleaning up
This product is miscible in water.
Large Spills: Dike the spilled material where this is possible. Stop leak if it can be done without risk. Absorb spillage to prevent material damage. Absorb in vermiculite, dry sand or earth, and place into containers. Prevent entry into waterways, sewer, basements, or confined areas. Following product recovery, flush area with water.
Small Spills: Absorb spillage with noncombustible, absorbent material. Clean surface thoroughly to remove residual contamination.

Environmental precautions
Avoid discharge into drains, watercourses, or onto the ground.

7. Handling and storage

Precautions for safe handling
Do not breathe mist or vapor. Do not get in eyes, on skin, or on clothing. Do not taste or swallow. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. For personal protective equipment, refer to section 8 of the SDS. Keep away from metals and other incompatibles. Observe good industrial hygiene practices. Label containers appropriately.

Conditions for safe storage, including any incompatibilities
Store locked up. Store in corrosive-resistant container with a corrosive-resistant inner liner. Store in original tightly closed container. Keep only in the original container. Store in a cool, dry place out of direct sunlight. Store away from incompatible materials (refer to section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits
No occupational exposure limits noted for the ingredient(s)

Biological limit values
No biological exposure limits noted for the ingredient(s)

Appropriate engineering controls
Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Eyewash facilities and emergency shower must be available when handling this product.

Individual protection measures, such as personal protective equipment
Eye/face protection
Wear safety glasses with side shields (or goggles) and a face shield. Provide an emergency eyewash fountain and quick-drench shower in the immediate work area.

Skin protection
Hand protection
Wear appropriate chemical-resistant gloves. Advice should be sought from glove suppliers.

Other
Wear appropriate chemical-resistant clothing.

Respiratory protection
In case of insufficient ventilation, wear suitable respiratory equipment. Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fumes at levels exceeding the exposure limits. Advice should be sought from respiratory protection suppliers.

Thermal hazards
When necessary, wear appropriate thermal protective clothing.

General hygiene
Always observe good personal hygiene measures, such as washing after handling the material.
considerations and before eating, drinking and/or smoking. Routinely wash work clothing and protective equipment to remove contamination.

9. Physical and chemical properties

Appearance

- Physical state: Liquid
- Form: Liquid
- Color: Clear colorless or nearly colorless
- Odor: Odorless
- Odor threshold: Not available
- pH: 1.3
- Melting point/freezing point: Not available
- Initial boiling point and boiling range: 212°F (100°C)
- Flash point: Not applicable (does not burn)
- Evaporation rate: Not available
- Flammability (solid, gas): Not applicable

Upper/lower flammability or explosive limits

- Flammability limit, lower (%): Not applicable
- Flammability limit, upper (%): Not applicable
- Explosive limit, lower (%): Not applicable
- Explosive limit, upper (%): Not applicable

Vapor pressure: 17 mm Hg
Vapor density: 0.65
Relative density: 1.01 g/cm³

Solubility(ies)

- Solubility (water): Soluble in all proportions
- Partition coefficient (n-octanol/water): Not available
- Auto-ignition temperature: Not applicable
- Decomposition temperature: Not available
- Viscosity: Not available

Other information

- Explosive properties: Not applicable
- Oxidizing properties: Not applicable
- Percent volatile: 99%
- Specific gravity: 1.01

10. Stability and reactivity

Reactivity

This product is stable and nonreactive under normal conditions of use, storage, transport.

Chemical stability

Material is stable under normal conditions.

Possibility of hazardous reactions

No dangerous reaction known under conditions of normal use.

Conditions to avoid

Contact with incompatible materials. Do not use in areas without adequate ventilation. Avoid high temperatures.

Incompatible materials

Metal compounds. Oxidizers. Strong bases.

Hazardous decomposition products

None known. For hazardous combustion products, refer to section 5 of the SDS.
11. Toxicological information

Information on likely routes of exposure

Inhalation  May cause irritation to the respiratory system
Skin contact  Causes severe skin burns
Eye contact  Causes eye damage
Ingestion  Causes digestive tract burns

Most important symptoms/effects, acute and delayed

Direct skin contact may cause corrosive skin burns, deep ulcerations, and possibly permanent scarring. Direct contact with concentrated solutions may be corrosive to the eyes and may cause severe damage, including blindness. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

Inhalation of mists can cause severe respiratory irritation. Symptoms may include coughing, choking, and wheezing. Inhalation could result in pulmonary edema (fluid accumulation). Symptoms of pulmonary edema (chest pain, shortness of breath) may be delayed.

Ingestion may produce burns to the lips, oral cavity, upper airway, esophagus, and possibly the digestive tract. Symptoms may include abdominal pain, vomiting, burns, perforations, bleeding.

Acute toxicity

This product is not classified as an acute toxicity hazard. See below for individual ingredient acute toxicity data.

Skin corrosion/irritation  Causes severe skin burns and eye damage
Serious eye damage/eye irritation  Causes serious eye damage
Respiratory sensitization  Not expected to be a respiratory sensitizer
Skin sensitization  Not expected to be a skin sensitizer
Germ cell mutagenicity  Not expected to be mutagenic
Carcinogenicity  This product is not considered to be a carcinogen by IARC, NTP, OSHA, or U.S. ACGIH.

Not listed

Reproductive toxicity  This product is not expected to cause reproductive or developmental effects.
Specific target organ toxicity, single exposure  
Not classified as a specific target organ toxicity – single exposure
Specific target organ toxicity, repeated exposure 
Not classified as a specific target organ toxicity – repeated exposure
Aspiration toxicity 
Not expected to be an aspiration hazard
Chronic effects 
Frequent or prolonged contact may defat and dry the skin, leading to discomfort and dermatitis.

12. Ecological information

Ecotoxicity 
This product is not classified as environmentally hazardous; however, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Persistence and degradability 
Not available
Bioaccumulative potential 
Not available
Mobility in soil 
High water solubility indicates a high mobility in soil.
Other adverse effects 
No other adverse environmental effects (e.g., ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions 
Collect and reclaim or dispose of in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.
Local disposal regulations 
Dispose of in accordance with all applicable regulations.
Hazardous waste code 
The waste code should be assigned in discussion with the user, the producer, and the waste disposal company.
Waste from residues/unused products 
Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (refer to Disposal instructions).
Contaminated packaging 
Empty containers should be taken to an approved waste-handling site for recycling or disposal. Since emptied containers may retain product residue, follow label warnings even after container is emptied.
