**The Hand-Held  
 Paint Pail...**

**PERFECTED**

The Wooster Pelican pail is designed to work with a brush and roller at once. Painters can take it up the ladder, use both tools, and trim out the room in no time flat. Its durable, one-piece construction delivers professional performance and cleans easily.

**Built for Brushing**

The Pelican pail makes it easy to carry 1 quart of paint with you to all the areas that require the detail of a brush. To switch to a roller, place the brush against the back of the pail and an integrated magnet will hold it in place. Because it's molded inside the wall of the pail, the powerful Pelican magnet won't rust or trap paint.

**Comfortable & Secure**

The security strap on the Pelican expands to make room for large hands. There's no need to grasp the pail tightly, because the Pelican rests there effortlessly. Grip indents provide extra control and allow left- or right-hand use. Soft-feel elastomer adds more comfort.

**Ready for Rollers**

All rollers 4½-inches or smaller work seamlessly with the Pelican thanks to the built-in roller grid. The ledge at the top catches excess paint and returns it to the pail. A notch under the lip keeps the roller frame in place.

**Wooster Pelican Liner 3-Pack**

These form-fitting liners are designed to work perfectly with the Pelican pail. Rigid material, great for quick color changes. Disposable for instant cleanup. Made of clear, solvent-resistant PET (a recycled plastic).

Cat. No.	Item	UPC 0-71497-	Working Capacity	Shelf Pack	Cubic Ft. Per Pack	Pounds Per Pack

# Seven or Smaller: Wooster Has a Product That's

# JUST RIGHT

## Speed Bucket™

Not too big, not too small—the Speed Bucket has an aggressive, built-in grid that's perfect for painting with rollers that are 7-inches or less. Like the Pelican, it has a powerful magnet inside to securely hold a paintbrush in place, and a notch for resting a roller frame. The Speed Bucket also resists paint buildup for easy cleaning.

## Jumbo-Koter® Paint Tray

This lightweight product is a great option when working with rollers that are 4½-inches or smaller. Loading is easy because of the angled grid. Designed primarily for roller use, the Jumbo-Koter Paint Tray is molded out of recycled plastic.
