Proven Technology

Enhancing image, creating a healthy workplace and demonstrating commitment to the environment is top-of-mind for our customers. For a decade, Georgia-Pacific Professional’s family of enMotion® automated touchless towel dispensers have helped transform the world of touchless dispensing technology.

To help exceed washroom expectations, Georgia-Pacific Professional added the enMotion® line of soap and sanitizer dispensers to create the perfect bundle. Through the years, the enMotion® family of dispensers has evolved to provide enhanced hygiene solutions with sleeker design options for enhanced image, waste reduction benefits and measurable maintenance efficiencies.

Over 272,098,260,000 Hands Have Been Dried with enMotion® Towels in the Past 10 Years.

Helps improve hygiene
Automated touchless dispensing helps minimize risk of cross-contamination

Reduces waste
One-at-a-time towel dispensing reduces usage by at least 30%* compared to standard folded towels

Automatic roll transfer
Allows for complete use of roll, saving on maintenance time and cost

Adjustable settings
Allows you to choose the sheet length, time delay, sensor distance and towel settings

Customizable towel settings
Choose hang mode and a towel will always be present for your customers to help improve hygiene.
Choose on-demand mode and a towel will be presented by a simple wave of the hand to help control usage.

Over 10 Y ears of Touchless

Delivering Value

Enhances image
Sleek design coordinates with soap and bath tissue dispensers

Multiple power options
4 standard easy-to-install alkaline D cell batteries or optional AC adaptor

Meets ADA guidelines
Meets ADA guidelines when properly installed

Low battery light
Illuminates when batteries are low for easy maintenance

Water resistant model available

97% of enMotion® Towel Dispenser Customers are Overwhelmingly Satisfied with it’s Performance**

97% of enMotion® Towel Dispenser

*Proprietary research
**Source: Directions Research, Inc., May, 2007
**Elevate your image**

The enMotion® recessed automated towel dispenser turns an ordinary wall into a great one. Its sleek stainless steel finish and stylish design make it as impressive visually as it is functionally. Its “hands-free” towel delivery helps minimize the risk of cross-contamination, and its controlled dispensing feature reduces towel usage by at least 20 percent* compared to standard folded towels. Take a look and you’re sure to discover why it is the ultimate solution for today’s contemporary washroom.

**Touchless soap and sanitizer dispensing is the perfect companion**

Just one wave under the enMotion® dispenser releases a controlled portion of foam soap or sanitizer. With its rich, luxurious products and stylish design, this touchless wonder is the ultimate in hands-free hand hygiene.

**Enhance image**
Enhance the image of a facility with the enMotion® touchless dispenser

**Helps improve hygiene**
Automated touchless dispensing helps minimize the risk of cross-contamination

**Improve operational efficiency**
High-capacity system and adjustable portion control—setting range 0.4mL or 0.7mL

Easy-to-open design with bottom hinges allows for placement under a shelf, cabinet or where space is limited

---

**When space matters**

They fit right in. Which is exactly why enMotion® Impulse® 10 and Impulse® 8 dispensers are so popular. They require the least space of any enMotion® dispenser and are ideal for placement everywhere from nurse’s stations to food service prep areas and employee break rooms.

**For all the tight spaces**
All the benefits of hands-free towel dispensing in a smaller footprint

**Requires less vertical space**
Perfect for break rooms, nurse stations, food preparation areas

**Uses the same 10” towels as enMotion® classic and 8” towels as the enMotion® recessed**
Choose from a variety of towel options

**Promotes good hygiene throughout the building**
Touchless dispensing minimizes cross-contamination

**A variety of towels to meet your needs**

The enMotion® high-capacity towels are soft and absorbent for a fast and pleasant hand drying experience. Choose from multiple towels including, premium, high-capacity, lotion and environmentally preferable options.

**100-percent recycled towels**
Made with 100% recycled fiber,* these high-quality, high-capacity, cost-effective towels are good for the environment and easy on the hands

**A good feeling**
Options available for both brown and white enMotion®

EPA-compliant for recycled fiber content towels

Both have a quality feel and thicker texture that’s sure to impress

**EPA says “a-ok”**
We offer towels that meet or exceed the EPA Comprehensive Procurement Guidelines for post-consumer fiber content

---

*The enMotion® Impulse® 10 and Impulse® 8 dispensers are designed with softness in mind to help protect hands from frequent hand washing. When drying hands, the moisture triggers the release of lotion from the towel.

When helping the environment matters

At Georgia-Pacific, we’re dedicated to helping minimize our impact on the environment. Our enMotion® dispenser helps achieve the priority of source reduction by reducing paper towel usage by at least 30 percent.* Reducing waste is an important measure of being sustainable and is the core of our environmental commitment.

Protect the environment and enhance your customers’ bathroom experience

Our enMotion® automated towel dispenser and our towels which are EPA compliant for recycled fiber content provide opportunities to earn points for the U.S. Green Building Council’s LEED® Certification. At Georgia-Pacific, we support the Environmental Protection Agency’s (EPA) strategies of Reduce, Reuse and Recycle. In addition, we help our end-user customers demonstrate that their facilities are “sustainable,” in part due to the dispensing systems and paper products they choose. We have sustainable towel options that make it easy for you to lower your impact on the environment and help with your sustainable initiatives.

EcoLogo® certified

These GP products meet the EcoLogo® certification requirements for hand towels (ICCD-086).

Reduce Paper Towel Usage By 30%

These products are part of Georgia-Pacific’s sustainability platform—innovative products that both reduce environmental impact and improve operational efficiencies.

Reduce

Reducing waste has an immediate effect on the environment. Georgia-Pacific Professional is the leader in product systems, such as enMotion® Automated Towel Dispensers that reduce use and waste by encouraging users to take just the paper they need.

Reuse

Georgia-Pacific finds innovative ways to reuse the by-products of the paper making process for production and packaging. We recycle and reuse water throughout multiple stages in our mills. In addition, some of our by-products are used to help make grass seed, biofuels and provide a strong foundation for highways.

Recycle

Georgia-Pacific Professional’s reclaimed paper production generates less pollution than virgin paper production and fibers can be reused for repeated environmental savings. In 2000, we purchased GP Harmonie Recycling™ services to facilitate the brokerage of 9 million tons of recovered paper, over 10% of the U.S. woodpulp supply. And over 250 of our away-from-home products contain 95 to 100% recycled fiber.

Top Marks and Environmental Commitments

Third-party certification and verification. Products, systems and services that can help businesses earn environmental credit. Working with organizations that are committed to the environment. Adhering to global guidelines. They’re all part of our sustainability efforts at Georgia-Pacific Professional.
